

true survivors!

– impossible?

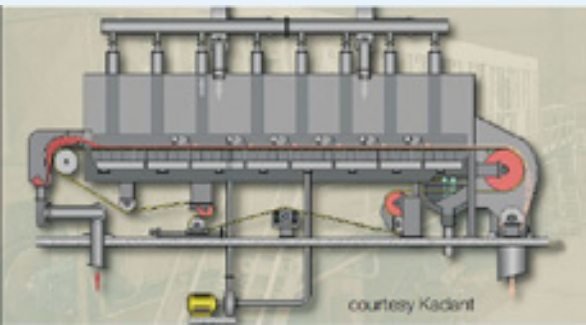

huydura & huydrain

customized for Chemi-Washers

true survivors!

huydura and huydrain belts offer top performance under heavy duty conditions!

the concept

Chemi-Washers operate under extreme chemical and thermal challenges. Customers judge their productivity in terms of their long term washing efficiency. Xerium offers a series of belt designs, both from the huydura and huydrain belt portfolio, which are harnessed to meet the most demanding requirements.

designed to offer high value

- user-friendly and safe belt handling
- high washing efficiency
- maximum use of washer potential
- favorable performance/ cost ratio

advantages

- rapid and safe belt installation
- economic use of chemicals and wash water
- scheduled belt changes

the components

- highly stabilized monofilaments resist extreme chemical (pH 1-14) and thermal (max.95°C) conditions
- “jumbo yarns“ guarantee optimum belt life
- strong weaving designs offer highest belt stability at any width up to 9m
- correct size, positioning and number of meshes combine optimum washing capacity with excellent fibre retention
- durable belt edges support trouble free belt guidance

exceptional seam technology

- resilient and user-friendly seam versions
- patented APM (Abrasion Protection Monofilament) wear protection
- customized tools for the safe installation of belts right from their box and tension free seam joining

huydura and huydrain belts made to survive in adverse conditions.
