VersaTec
Efficiency grade rubber covers designed for fabric, felt and paper carrying rolls.

Technology
Developed by Stowe Woodward’s global research and product engineering team, VersaTec is a general purpose rubber cover ideally suited for wire drive, felted press, size press, and coater applications.

VersaTec is also available with suction and blind drilled venting. In addition, harder covers can be grooved. It is also fully compatible with optional Lifegard II high temperature base technology.

Benefits
• excellent material strength to withstand impacts
• excellent mark and dent resistance
• superior solvent and chemical resistance
• heat resistant to 230 ° F, 110 °C
• hardness Range: 2 to 80 P&J
• black in color
